20 Bike Eco Cycle Compound with Racks

Product Datasheet | USP/ES20/10HR | 18 October 2026

A lockable, weather-sheltered compound providing dedicated cycle parking for up to twenty adult bicycles. Front and rear gates provide controlled access, with ten included square cycle stands, clear UV2 PETG side, front and rear panels, and 12 mm twin-wall polycarbonate to the upper central walkway.

20-Bike Eco Cycle Compound with ten-stand cycle racks and front and rear lockable gates, all included as standard

Hot-Dip Galvanised After Fabrication

The mild steel used in Urbanfab products is hot-dip galvanised after fabrication to ISO 1461:2022. Total immersion in molten zinc allows the protective coating to reach both external surfaces and accessible internal areas of hollow steel sections, where conventional surface-applied finishes may not provide protection.

The metallurgically bonded zinc coating provides long-term corrosion protection, helping protect against hidden corrosion within hollow sections and reducing the need for future maintenance and repairs. Find out more at [urbanfab.com/why-we-galvanise/](https://www.urbanfab.com/why-we-galvanise/)

Dimensions and Construction

Specification	Details
Capacity	Up to 20 adult bicycles; ten square cycle stands included
Overall size	5080 mm W × 3500 mm D × 2100 mm H
Frame	50 × 25 mm RHS mild steel; hot-dip galvanised to ISO 1461:2022
Mounting	Bolt-down base plates for a suitable hard surface
Stands & Locking	Ten square cycle stands; additional locking bars for chains and D-locks
Gates & Panels	Front and rear lockable gates with 5 mm locking plates, 3 mm UV2 PETG and 12 mm twin-wall polycarbonate

Compound Configuration and Price

The standard price includes the front and rear lockable gates, ten square cycle stands, locking bars, clear UV2 PETG panels and central walkway polycarbonate.

20-bike compound and finish	Ex VAT	Inc VAT
20 Bike Eco Cycle Compound with Racks	£4,844.00	£5,812.80
Optional powder-coated finish	Please call to enquire	—

Lockable Gates and Secure Cycle Parking

Front and rear mild-steel gates provide controlled access to the enclosed compound. Integrated locking posts and 5 mm galvanised steel locking plates accept padlocks and provide a deterrent to unauthorised entry.

The ten included square cycle stands provide parking for up to twenty adult bicycles. Additional locking bars offer anchoring points for D-locks and chain locks, allowing riders to secure frames and wheels.

Panel Materials and Optional Finish

- **Clear UV2 PETG.** 3 mm impact-resistant, transparent panels, UV-stabilised on both sides; used at the front, rear and sides.
- **Twin-wall polycarbonate.** 12 mm multiwall panels along the upper central walkway.
- **Optional RAL powder coating.** Available over the hot-dip galvanised steelwork to form a duplex coating system, providing an additional protective barrier and a coloured finish. See our [Powder Coating page](#) for finish options, coastal recommendations and further information.

Site Planning and Project Requirements

The compound is designed for organisations needing a dedicated, controlled-access cycle parking area, including workplaces, education settings and public-sector sites. Its twenty-bike capacity helps make cycling practical for regular commuters and visitors.

Our team can advise on capacity, compound layout and suitability for your available space. Please contact us to discuss access requirements, site constraints or delivery arrangements before placing an order.

Delivery and Installation

Free UK mainland delivery is included. For destinations outside the UK mainland, please contact us for a tailored delivery quotation.

Standard compound configurations are typically delivered within 7 days. Powder-coated orders may require additional lead time; please contact us for confirmation before ordering. We will advise on any delivery arrangements for your site.

The compound is supplied flat-packed and ready for assembly, with the required frame and panel assembly fixings included. It is designed for bolt-down installation on a suitable hard surface. Ground anchors are available separately for a range of hard surfaces at a small additional cost; we will contact you after ordering to discuss suitable options.

Ordering Information

Before ordering, please check the available space, installation surface and site access. When ordering, please confirm your delivery postcode and preferred delivery date, and let us know if you have any bespoke requirements or would like to discuss alternative layouts to suit your project.

Further information about order preparation, delivery arrangements and aftercare is available on our [Delivery Information page](#).

Need help planning your cycle compound? Our team can offer practical advice on site layout, capacity, panels, galvanising and delivery.
