Lancaster Eco Smoking Shelter

Product Datasheet | Lancaster Range | 24 October 2026

The Urbanfab Lancaster Eco Smoking Shelter provides a generous, weather-sheltered space for approximately 12–14 people. Ideal for busy commercial, industrial and workplace sites, its open-fronted design features clear UV2 PETG rear panels as standard, with optional side panels to suit different applications.

Lancaster Eco Smoking Shelter shown with clear UV2 PETG rear panels and optional full side panels

Hot-Dip Galvanised After Fabrication

The mild steel used in Urbanfab products is hot-dip galvanised after fabrication to ISO 1461:2022. Immersion in molten zinc helps protect the external frame and accessible internal surfaces of hollow steel sections.

The bonded zinc coating provides long-term corrosion protection, helping reduce future maintenance and repairs. Learn more at urbanfab.com/why-we-galvanise/.

Dimensions and Construction

Specification	Details
Capacity	Approximately 12–14 people
Overall footprint	3050 mm W × 2000 mm D
Height (front / rear)	2200 mm / 2100 mm
Frame	50 × 25 mm RHS mild steel; hot-dip galvanised to ISO 1461:2022
Standard rear panels	3 mm clear UV2 PETG; UV-stabilised on both sides
Optional side panels	Half-height or full-height clear UV2 PETG
Mounting	Bolt-down base plates; ground anchors available separately
Assembly	Flat-packed with frame and panel assembly fixings included

Standard Configuration and Price

The Lancaster Eco Smoking Shelter includes 3 mm clear PETG rear panels, UV-stabilised on both sides (UV2). These help protect occupants from wind and rain while allowing natural light through and maintaining visibility.

Prices below are for the complete shelter with the listed panel configuration.

Shelter configuration & optional extras	Ex VAT	Inc VAT
Clear UV2 PETG rear panels included	£1,274.00	**£1,528.80**
Rear panels + half-height PETG side panels (+£195.00 ex VAT)	£1,469.00	**£1,762.80**
Rear panels + full-height PETG side panels* (+£338.69 ex VAT)	£1,612.69	**£1,935.23**
Optional powder-coated frame	**Please call to enquire**	

Smoking Shelter Compliance

For smoking use, a roofed shelter must not be substantially enclosed under UK smoke-free regulations: at least 50% of the total surrounding wall area must remain permanently open. Nearby walls and structures must also be considered. Half-height side panels can provide additional shelter while retaining an open design; full-height side panels are intended for alternative, non-smoking applications.

Optional Powder Coating

The mild-steel frame is hot-dip galvanised after fabrication to ISO 1461:2022 as standard. An optional RAL colour powder-coated finish can be applied over the galvanising to form a duplex coating system. Please see our Powder Coating page for finish options, coastal recommendations and additional benefits.

Delivery and Installation

Free UK mainland delivery is included. Standard stock configurations are normally delivered within 4–5 days. For other destinations, please contact us for a quotation. Optional powder coating typically adds 3–4 working days.

The shelter is supplied flat-packed with frame and panel assembly fixings included. It is designed for bolt-down installation on a suitable hard surface. Ground anchors are available separately at a small additional cost; we'll contact you after ordering to discuss suitable options for your installation.

Ordering Information

Before ordering, please check the available space, installation surface, site access and nearby walls. When ordering, please specify your chosen side-panel configuration and any powder coating or bespoke requirements, along with your delivery postcode, preferred delivery date and any special delivery instructions, such as restricted site access, designated delivery contacts or advance notice requirements.

Prices checked against the Urbanfab product listing on 17 October 2026. A quotation confirms the final specification, price and delivery date.
