Dunstanburgh Wheelie Bin Store

Product Datasheet | Commercial Bin Stores | 26 October 2026

The Urbanfab Dunstanburgh Wheelie Bin Store provides screened commercial waste storage for up to two standard 1,100-litre wheelie bins. Choose an open or lockable gated front, with or without a roof, to suit a wide range of settings. Hot-dip galvanised steel and Skybond ACM panels provide a robust, low-maintenance enclosure.

Dunstanburgh Wheelie Bin Store shown with gated front, optional pent roof and Anthracite Grey Skybond ACM side panels.

Configurations and Prices

Dunstanburgh configuration	Ex VAT	Inc VAT

1,100-Litre Wheelie Bin Size Guide

Typical dimensions for UK 1,100-litre commercial wheelie bins are shown below. Actual bin sizes vary by manufacturer and waste contractor; please measure your bins and allow clearance for access and manoeuvring.

Bin size	Width	Depth	Height
1,100 L	1250–1372 mm	980–1120 mm	1315–1385 mm

Panel Materials and Colour Options

The Dunstanburgh is supplied with 3 mm Skybond aluminium composite (ACM) side and rear panels. Available colours include White, Grey, Anthracite Grey, Black, Blue, Racing Green, Red and Yellow. Reversible matt and gloss faces allow the preferred finish to be selected during assembly. Please see our **Panel Options** guide for specifications and care information.

Front and Roof Configurations

An open front provides straightforward access while the side and rear panels screen the stored bins. Where the gated option is selected, lockable perforated galvanised steel gates provide controlled access while maintaining airflow. The optional sloping pent roof incorporates a matching Skybond ACM panel to help direct rainfall away and provide overhead weather protection.

Hot-Dip Galvanised After Fabrication

The 50 × 25 mm RHS mild-steel frame is hot-dip galvanised after fabrication to ISO 1461:2022. Immersion in molten zinc helps protect external steelwork and accessible internal surfaces of hollow sections. The bonded zinc coating provides long-term corrosion protection.

Installation & Assembly

The Dunstanburgh Wheelie Bin Store is supplied flat-packed for self-assembly, with the required assembly fixings and concrete Anka bolts included. Allow approximately 3–4 hours for assembly by two people.

The 6 mm galvanised steel base plates have four anchor holes each for secure installation on a suitable concrete surface. Alternative ground anchors are available for other suitable hard surfaces at a small additional cost. We'll contact you after ordering to discuss suitable options.

Delivery Information

Free UK mainland delivery is included within 10 days. We'll confirm the expected delivery timescale after ordering. For other destinations, please **contact us** for a tailored delivery quotation.

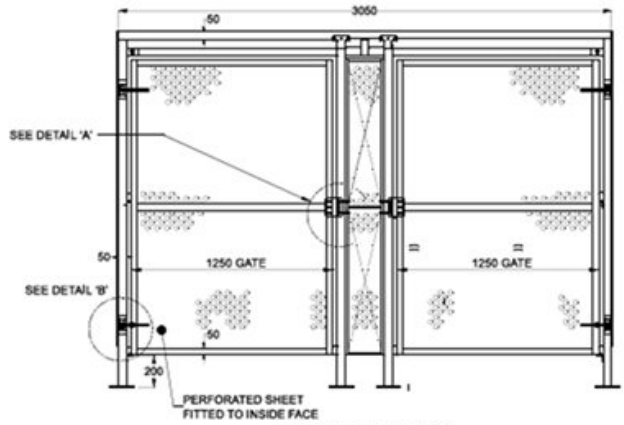

Ordering Information

Before ordering, please check your wheelie bin dimensions. Select your preferred front configuration, roof option and ACM panel colour, and provide your delivery postcode, preferred delivery date and any special delivery instructions. For bespoke requirements, please contact us — we'll be happy to discuss your needs.
